**Jaka Lounge agency** is providing complete human resource management support for companies. We put our special focus on high-quality selection process while we believe that knowledge and competencies bring brilliant results only when they're combined with adequate motivation. We are supporting our client AgriCircle:

Food matters to all of us. To improve its quality and availability we believe that sustainable and efficient agriculture will be essential.

**AgriCircle** is an ag-tech startup, headquartered in Switzerland that equips farmers with technology and decision support to enable the production of more and better food.

What we do is purpose driven, requires hard work, personal sacrifice and to overcome lots of barriers. A journey that offers limited financial rewards, but many complex challenges to resolve that will eventually not only change an entire industry but secure what matters to all of us.

For our in-house development team, we are looking for a:

# Lead Senior Ruby Engineer / Product Manager

You will help to create and shape an innovative product that will revolutionize farm management as we know it. As a Senior Ruby Engineer, you will be solving complex programming tasks and be responsible for technical management support.

**We offer:**

- International working environment in a dynamic company
- Opportunity to shape innovation with a positive environmental and economic impact
- High exposure to GIS technologies and M2M applications and latest innovations in agriculture (e.g. drone and satellite technology)
- Innovation and performance driven environment with exposure to leading professionals and scientists
- Work with modern technology (incl. Ruby 2, JS React, PostgreSQL)
- Exposure to latest innovations in agriculture
- Opportunities to work in a young and growing team with personal development opportunities
- Ability to work from home

**You offer:**

- University degree in IT or equivalent work experience
- Experience in managing a small developer team
- 5+ years of experience as a Ruby on Rails developer
- 3+ year working experience with the SCRUM framework (SCRUM Certification is a plus)
- 2+ year working experience with a frontend framework (JS React experience is a plus)
- Experience with GIS Frameworks is an asset
- Several years of experience designing and implementing REST API's
- Strong analytical, mathematical and conceptual skills combined with result oriented and problem-solving capabilities
- Passion for test-guided design and beautiful code
- Appreciation for design and usability with an eye for details
- Integrative, stress resistant team player with strong interpersonal and relationship building skills
- Good coaching and project management skills
- Proficiency in English
- German is an asset
- International work experience is an asset

**Take the next step with us:**

If you are looking a purpose driven challenge and fit the criteria listed below, we would be delighted to receive your application. Please send your CV and application letter to: alex@jakalounge.com
