

Jaka Lounge agency is providing complete human resource management support for companies. We put our special focus on high-quality selection process while we believe that knowledge and competencies bring brilliant results only when they're combined with adequate motivation.

We are supporting our client, a rapidly growing tech startup from the UK, who develops productivity tool based on artificial intelligence and powered by cutting-edge technology that increases efficiency and improves message quality.

In order to expand their team, we are looking for a:

Software Engineer (remote position)

As a software engineer, your day-to-day work will involve:

- designing, building and testing the backend (and sometimes a bit of related frontend) of a company that will impact lives of millions;
- analysing and improving efficiency, scalability and stability of the current system;
- planning future architecture and making technical decisions;
- collaborating with other developers and business team.

To join the team you must have:

- several years of experience working as a Python developer;
- strong understanding of modern programming languages (backend is written in Python, and you will occasionally also touch JavaScript);
- knowledge of networking concepts and RESTful design;
- knowledge of data structures, algorithms and object-oriented design patterns;
- understanding of database concepts (MongoDB);
- understanding of CI/CD using tools such as Jenkins;
- good organizational and time management skills.

It would be nice if you have experience with:

- cloud computing services (such as AWS / Google Cloud);
- docker and related services such as Kubernetes;
- scaling and performance with large scale applications;
- frontend incl. HTML / CSS / JS;
- modern React ecosystem (Redux, Yarn, ES6 etc.);
- developing for customer service or ticketing systems such as Zendesk;
- working in a team.

Benefits:

- a full-time position on remote basis;
- continuous learning opportunity;
- possibility to work with a company that will ultimately impact the conversation experience of millions of users;
- competitive salary, stock options and perks (co-working space and any tools/equipment you need, flights & accommodation for the company's get-togethers)
- as much responsibility as you like since it's a startup, after all 😊
- career progression towards e.g. a technical expert position (e.g. systems architect) or a technical team lead;

If you think this opportunity is a right fit for you, then please submit your CV in English at nina.djordjevic@jakalounge.com.
