

Jaka Lounge agency is providing complete human resource management support for companies. We put our special focus on high-quality selection process while we believe that knowledge and competencies bring brilliant results only when they're combined with adequate motivation. We are supporting our client [TMS](#):

TMS is an international software development company that works under a Team-as-a-Service (TaaS) model, providing custom enterprise software development services to partners worldwide. Working on large-scale applications in a wide variety of business fields, from fintech to marketing automation, helped us acquire broad experience with developing complex solutions that require high level of security, integration with remote APIs and interaction with large amounts of data.

Our team is growing, and we are looking for people who are team players ready to take their own initiative to improve code, suggest solutions, fix problems, not only do what's told. With offices in Belgrade, we are looking for an experienced:

PHP Developer (Belgrade)

Responsibilities:

- Develop web app back-end logic, mostly using microservices/ REST API based
- Develop web app front-end logic, mostly using JavaScript and AJAX with Foundation Framework for UI/UX, and integration with back-end API (built on Slim Framework)
- Work with additional services such as Elasticsearch and others
- Write highly organized, maintainable code
- Solve difficult problems while continuously learning and improving
- Maintain data and code security and protection for the delivered projects.

Qualifications:

- Experience with full stack web development – OOP in PHP with MVC frameworks
- Good knowledge of JavaScript and AJAX; TypeScript, React.js, Vue.js and Bootstrap are a plus
- Good knowledge of MySQL and Elasticsearch; Redis is nice to have
- Experience with package managers Git, Composer, NPM and Maven
- Experience in any testing framework, preferably PHPUnit
- Experience with integrating payment providers (PayPal, Wirecard, etc.) and with B2B projects and enterprise web development is a plus
- Experience with agile software development
- English language - above intermediate level is needed as we use it in daily work
- Responsibility for your work - developer's scope of responsibility is not only the current task, but the whole project
- Experience with teamwork, collaboration, pair programming.

What we offer:

- Developing interesting and challenging projects and using modern technologies
- Working in a friendly, family-like atmosphere
- Work from home (5 days of remote work per year)
- Personal development through trainings, education and certifications
- Opportunity to collaborate with first-rate full-stack developers, discover new approaches and technologies by learning from mentors
- Working under Agile principles
- Community budget and team building events.
